

eChannelling unveils AI-Powered eHospital and Health Scan at Medicare 2025

Nalinda Jayatissa, Minister of Health, presents a token of appreciation to Dr. Mothilal De Silva, Chairman of SLT-MOBITEL, at Medicare 2025.

eChannelling showcased ground-breaking AI-powered health technologies at Medicare 2025. As the Official Digital Healthcare Partner for Medicare 2025, eChannelling unveiled multiple innovations to transform healthcare accessibility and monitoring in Sri Lanka, including an advanced AI-powered face scanning system capable of analyzing vital health metrics in seconds. Dr. Mothilal De Silva, Chairman of SLT-MOBITEL, officially unveiled these cutting-edge technologies, reinforcing the Company’s commitment to digital healthcare AI advancements in the country.

Nalinda Jayatissa, the Minister of Health, experienced a demonstration of eChannelling’s revolutionary face-scanning technology. This technology analyzes key health indicators, including pulse, blood pressure (systolic and diastolic), cardiac stress levels, heart rate variability (HRV), and breathing patterns, all through a simple facial scan.

The 14th edition of this exhibition also marked the official launch of several other innovative solutions by eChannelling. The eHospital Virtual Consultation is a comprehensive telemedicine platform allowing patients to connect with healthcare providers via video consultations from their homes. Additionally, eChannelling introduced its Smart Ring Health Monitoring, a cutting-edge wearable device providing continuous 24/7 health monitoring.

The company also highlighted the ePremium Membership, a program offering enhanced healthcare services. Visitors to the eChannelling booth participated in an interactive online quiz competition with winners receiving exciting gifts and complimentary ePremium memberships.

Participating in Medicare 2025, eChannelling demonstrated a strong commitment to integrating AI-powered technology to drive healthcare innovation and make medical services more accessible, efficient, and personalized for all Sri Lankans. The technology enables customers to perform AI-powered health scans in the comfort of their own homes, addressing a significant gap in remote healthcare monitoring. As eChannelling celebrates two decades of transforming lives, it is also journeying towards an exciting future. The company is set to transform the nation’s digital ecosystem by accelerating and enabling significant strategic shifts in digital healthcare and lifestyle through cutting-edge products and superior service offerings. Powering eChannelling is SLT-MOBITEL, whose technology and platforms have contributed to the nation’s digitalization and enrichment of healthcare.
