

# A Green Venture On World Environment Day

In order to offset monthly electricity consumption Nandun Chandaratne from Nugegoda chose BAM Green as the solution provider to install a 4kWp roof top Solar Photo-Voltaic system. Notably, the agreement was signed on the world environment day highlighting the significance of the occasion.

The system is expected to reduce approximately 480 units a month from Chandaratne’s electricity bill and moreover it will offset his carbon footprint of electricity by around 4.5 tonnes per year.

Simultaneously to the signing of the agreement, BAM GREEN commenced their annual monitoring and maintenance service programme for installed systems of  past clients.

BAM Green is established as a distributor of top quality Solar power systems in Sri Lanka incorporating REC, a Norwegian solar module which is recognised among the top three solar panel providers in the world. Thereby, it is known to be among the world’s best solar panels in many aspect including cost performance.

BAM Green also awards their customers certificates for reduction of greenhouse gas emissions in collaboration with the Carbon Consultancy Company.
