The London-based wellness clinic, The Elixir, is renowned internationally for its intravenous (IV) therapy, and has six branches in the UK and the United Arab Emirates. Through the franchise partnership with Christell Clinic, the brand made its debut in South Asia, the initial stage of its global expansion plan.

Patients at the clinic will be able to enjoy their exclusive VitaDrip® infusions customized for each individual. The nutrient-packed IV infusions are unique formulations that offer numerous benefits including strengthening the immune system and improving energy. The high-quality nutrients such as vitamins, minerals, and amino acids within the infusions are administered in-travenously into the bloodstream, allowing for 100 percent absorption of the nutrients.

Addressing the gathering, Acaena Amoros and Mahi Aramideh said, “In our quest to become the world’s leading wellness brand, we are proud to see the growth of the Elixir Clinic to South Asia by having chosen Christell Clinic as our first franchise partner. Wellbeing is an important component and we believe that Sri Lankans will appreciate the naturalness of this treatment”.

“Over the years, the skincare industry has evolved from merely pampering services to offering treatments that are technologically and technically advanced,” commented Professor Ramani Arsecularatne, Director, Christell Clinic. “As part of our efforts into providing our clients with the latest high-quality services, we are excited to bring The Elixir Clinic to Sri Lanka along with the innovative and holistic services it provides.” Dr Shanika Arsecularatne spoke of the time-lieness of the partnership, citing the growing interest towards wellness. “Beauty and wellness is now a necessity to keep up with the fast-paced lifestyle. The partnership with Elixir Clinic is an answer to the individuals who seek preventive treatment and maintenance therapies to sustain health and wellbeing.”
