Dharma Dheerasinghe, the Chairman, Commercial Bank commenting on the Bank's performance, said that he is happy to note that the confidence of valued customers has enabled the Bank to reach the milestone of one trillion rupees in deposits. "However, the rate of taxation on banks continues to be a matter of concern, particularly in the context of the challenging external conditions affecting the industry. As a systemically important bank and as a responsible stakeholder of the economy, we need to focus on further increasing our capacity to support key sectors of the economy, and while the taxes we pay represent one form of support, there are many others including SMEs that need attention," he said.

S Renganathan, Managing Director and Chief Executive Officer, Commercial Bank, explained that the Bank has followed a more cautious approach in expanding its advances portfolio during these challenging economic conditions, which has contributed to a marginal decline in the loan book in comparison to December, 2018. He said this has contributed to a drop in net interest income and has also had a cascading effect on the Group's profit after tax.

S Renganathan added, "Despite the decline in advances, I am happy to say that the Bank has continued to support the SME sector, as reflected in the satisfactory growth of this portfolio during the quarter".
