

# ComBank Q+ Enhanced With

Posted on

---

Customers of Commercial Bank can now pay bills instantly via the ComBank Q+ App connected to the Bank's debit, credit or prepaid cards, following the introduction of an 'In- App Bill Payments' feature. This latest upgrade to ComBank's Q+ enables users to make payments under six categories such as data reloads, prepaid and

postpaid mobiles, fixed telephone lines, utilities, water as well as electricity (CEB and LECO) and pay TV bills. The facility will be further enhanced with the inclusion of more beneficiary companies such as educational institutes, insurance companies, credit cards payments and Prepaid card top up shortly. To pay through the ComBank Q+ App, users simply have to click on the 'Bill Payment' option on the App, select the preferred billing category organization and insert requested details. After confirming the transaction through the App PIN, their selected card will be debited. Customers can save their recurring bill payments under the 'Favorites' tab to avoid re-entering billing account numbers. Since a Personal Identification Number (PIN) is required to make bill payments, it is a secure process, the Bank said. The App offers real-time updates on online payments and is easy to navigate, owing to its user-friendly interface. It also offers bill number validation for most billing companies. Benefits to ComBank Q+ users include the convenience of instant registration, hassle-free bill payment options, and other payment options such as the ability to make payments by scanning QR Codes for purchases of goods as well as services at any LANKAQR enabled merchants. ComBank Q+ is a robust, state-of-the-art mobile App operable on both Android and iOS devices. It was the first Quick Response (QR) based payment App to be launched under LANKAQR and was designed as a hassle-free payment alternative for cardholders and vendors. Customers can use their ComBank MasterCard, Visa Credit, Debit or Prepaid Cards to register.
