

Commercial Bank Widens Mobile Access To Online Services

Posted on

Account holders of Commercial Bank of Ceylon now have access to internet banking facilities offered by the Bank even while they are on the move, following the launch of a dedicated WAP Portal by the Bank to facilitate access to a wider segment of mobile phone users.

The Wireless Application Protocol Portal facilitates online access via mobile phones by detecting the device used by the account holder and configuring the setting accordingly, the Bank said.

Nearly all the features available to registered users accessing the Bank's online services via computer are now available free of charge to those accessing the facility through mobile phones, such as checking account balances, transferring funds, and paying bills, among others. These facilities can be accessed through all five mobile networks.
