

DIMO Launches Power Panel Manufacturing Plant

Ranjith Pandithage, Chairman/MD; Gahanath Pandithage, Group CEO; Asanga Ranasinghe, Chief Marketing Officer along with the staff at the opening ceremony.

Diesel & Motor Engineering (DIMO) has launched its own power panel manufacturing plant at the DIMO Logistics Centre in Weliveriya.

DIMO began manufacturing their own electrical power panels two years ago, to cater to the electrical projects secured by various divisions of the company.

DIMO has achieved a stride by expanding its operations into the manufacturing of low voltage electrical panels, adhering to the highest international standards to cater to the local and international market.

This venture includes providing electrical panel solutions for commercial, industrial and infrastructure projects and many more. The product solutions consist of manufacturing, supply, and installation and commissioning of high quality Power Distribution Panels, ATS/ AMF/Changeover Panels, Power Factor Correction Capacitor Bank, Motor Control Panels and PLC based automated systems panels. The company's clientele currently includes MEP contractors, Civil Construction Companies and corporate and Government clients such as Brandix, Access, Hirdaramani, Polytex and Sri Lanka Navy.

This is another milestone added to the journey of DIMO and its contribution to the country and its development. The power industry plays an important role in any economy. DIMO encompasses 80 years of heritage as well as expertise in the

power sector for several years, we are proud to enter into the power panel manufacturing business and spread our wings in to the different segments in the power sector,” said Ranjith Pandithage, Chairman/MD.

“We are delighted to have introduced these power panels under the brand name, DIMO Lumin. As quality and standards are pivotal aspects in the power panel manufacturing industry, we will constantly invest in improving our products. We are extremely buoyant with this new venture and hope that it will contribute immensely to the manufacturing sector of Sri Lanka”, stated Wijith Pushpawela, Executive Director.

DIMO stands as specialized contractors for any type of electrical installation work in structures including apartments, factories, hotels, water treatment plants and waste water treatment plants, in low voltage applications. Their scope of capacity includes design, supply and installation of total electrical installation solutions, electrical power distribution systems, cable management systems, power, control and instrumentation cabling.
