

DIMO Reimagines Construction In Sri Lanka With Fischer

(L-R): Samitha Jayakody, Director, Architectural and Buildings, RDC; Constantin Wiegert, Product and Marketing Manager – Passive Fire Protection Systems, Fischer; Andreas Jester, Export Manager, Fischer; S A Karunaratne, Managing Director, Stems Consultants; Ananda Senarath, Director, Stems Consultants; and Wijith Pushpawela, Executive Director, DIMO at the panel discussion.

Diesel & Motor Engineering along with Fischer, conducted a product portfolio re-introduction and knowledge sharing session with Sri Lanka's construction industry companies. Having tied up with the Fischer Group of Companies, DIMO has been marketing Fischer products in Sri Lanka for over 15 years.

Ranjith Pandithage, Chairman and Managing Director of DIMO stated, "I am thrilled to see so many top professionals from the construction industry here to grace this occasion. When you look at the DIMO product portfolio, you will realize that we represent world-class products to provide Sri Lankans the best of the best. We get our top class professionals to look after the products we market. With the development in the country and the progress in the construction industry, we feel that Fischer will continue to be a very important partner in our journey."

Two representatives from Fischer, Andreas Jester, Export Manager as well as Constantin Wiegert, Product and Marketing Manager for Passive Fire Protection Systems, briefed the audience about the anchoring as well as fire protection system products offered by Fischer.

In the mean time, the two German experts elaborated on how these Fischer products can help boost the construction industry in Sri Lanka.

Following the product presentations, the attention shifted to an informative panel discussion that included professionals in the construction industry in Sri Lanka.

Wijith Pushpawela, Executive Director of DIMO stated, “When it comes to Fischer products, FireStop is widely used in the country in all high rise buildings. Anchoring as well as fixing solutions are also widely used in the construction industry now. At DIMO, we are not only selling products but we sell solutions. Our products are backed by application specialists who train users on how to use them properly.”

During the discussion, the three Sri Lankan panelists shared their insights as well as their observations about the construction industry while the two German panelists were focused on further educating the gathering on how Fischer products can help boost to re-imagine the construction industry in the country.
