Dragon Systems Appoints D&J Enterprises

Dragon Systems Inc. of USA appointed D&J Enterprises as their distributor for Sri Lanka. D&J Enterprises will introduce the speech recognition software, Dragon naturally speaking, to the Sri Lankan market. It is the world's first general-purpose large vocabulary continuous speech recognition product for PC's.

Dragon Systems Inc., is a worldwide supplier of speech and language technology. The speech capabilities available from Dragon Systems include continuous and discrete dictation systems, voice command systems, text to speech systems, customized telephony solutions and developer tools which enable users to build interactive dialogues or custom vocabularies that do not need to be trained. Dragon Systems was founded in 1982 by speech industry pioneers Drs Jim and Janet Baker. Today Dragon remains the only company to offer speech products for MS-DOS, Windows 95, Windows NT, Apple Macintosh, MAC OS, DSP and Telephony platforms.

Dragon naturally speaking which D&J Enterprises introduces to Sri Lanka lets users dictate text in to their PC's at normal speaking speed without pauses between words at speeds of upto 160 words per minute or more and accuracy upto 95% or greater. System requirements to run this software are, minimum 133 MHz Pentium Processor, IBM compatible PC, Windows 95, Windows NT 4.0, industry standard 16 bit soundcard or built in audio systems on desktops and portables including the Sound Blaster 16 and other selected cards. Hard disc requirements, 16MB Memory requirements Windows 95 32MB or Windows NT 48 Mb.
