eChannelling, the largest Doctor Channeling Network in Sri Lanka together with Lanka

Hospitals, the internationally accredited multiple awardwinning healthcare provider announced the launch of a new play area for children at Lanka Hospital premises. The objective of the play area is to facilitate the many families that visit Lanka Hospitals for quality medical care. Families can keep their children occupied in the play area during medical treatment. The new facility also enhances customer convenience for parents and children for whom visiting the hospital will be a pleasant experience.

Being able to play in a hospital makes children more amenable to receiving treatment in the hospital setting. The play area is a thoughtful gesture taken by eChannelling and Lanka Hospitals to keep children at ease while consulting doctors and thus benefitting the parents as well.
