‘Enhance’ Your True Beauty At The Ultra-Modern Durdans Cosmetic Care Centre

Durdans Hospital has launched its ultra-modern cosmetic care centre ‘Enhance’. The facility was declared open by leading clinicians.

Speaking on the opening, a clinician at the centre stated, “Beauty is something that everyone desires. It is also something that everyone possesses. At ‘Enhance’ our aim is to help patients reveal their true beauty. Our highly-experienced consultants, surgeons and nursing teams are trained and equipped to handle the largest variety of surgical and non-surgical cosmetic care procedures that will be made available at a safe, convenient and ultra-modern facility at Durdans Hospital. My team and I look forward to not simply changing the way people look but providing solutions to change how people feel about themselves.”

‘Enhance’ has a wide array of services ranging from basic skin care, anti-ageing treatments, hair reduction therapy, body toning and contouring, facial rejuvenation surgery, facial contouring surgery, aesthetic and cosmetic medical procedures and cosmetic surgical procedures.

“At the skin care clinic, dermatologists will identify the specific root causes for age-old dermatological problems such as acne and pimples, stretch marks and open pores, and thereafter provide a permanent solution. High-speed laser hair reduction procedures will also ensure no side effects, no pain and immediate recovery. Botox injections, skin boosters and PRP skin rejuvenation therapy will also be available to fight the effects of ageing,” Dr T Sabesan, consultant maxillofacial surgeon, stated.

For those who wish to take matters a step further, facial rejuvenation and facial contouring surgeries such as a face lift, facial implants, chin shaping (genioplasty), lip shaping (cheiloplasty), nose shaping (rhinoplasty) and ear shaping (otoplasty) can also be arranged. Under the more complex cosmetic surgical category, ‘Enhance’ will perform such procedures as breast enhancement implants and breast reduction, liposuction, tummy tucks and many other plastic surgery procedures that help patients to reshape their body and regain confidence.

Dr Wimal Jayantha, director of medical services, added, “Durdans Hospital is pleased to introduce its Cosmetic Care Clinic, which is supported by skilled clinicians and guided by the highest international standards for the health and safety of patients. A clean environment for procedures is maintained under the guidance of standards set through Joint Commission International (JCI), for which Durdans has received the Gold Seal of Approval for Patient Safety and Quality of Care.”
