

EXEDY Clutch And Transmission Solutions From Douglas & Sons

Posted on

EXEDY is a clutch specialist and supplier to the automotive industry worldwide with a range of products, from manual transmissions, to torque-converter automatics. As an all-round manufacturer of transmission systems, EXEDY is responsible for product concept, development, production, and after sales services.

EXEDY's Manual Transmission (MT) business includes clutches for passenger, heavy duty, motorsports and flywheel applications. EXEDY also supplies products with made-to order, multi-item, and small sized production for heavy construction machinery, industrial vehicles, and agricultural equipment, under EXEDY's Transmission System products.

To meet today's demand for an easy, smooth and comfortable drive, EXEDY is fully equipped with a comprehensive production system for Automatic Transmission parts and has developed a high-efficiency compact super-elliptical type torque converter employing advanced hydrodynamics, as well as the world's smallest and lightest forward-reverse unit necessary for continuously variable transmissions.

EXEDY is also expanding its range of business from the development and manufacture of individual automatic transmission parts to complete transmissions.

Founded 70 years ago as Daikin Manufacturing, EXEDY is one of the world's largest Original Equipment suppliers of manual transmissions as well as automatic transmissions, supplying to several Japanese manufacturers such as Toyota, Honda, Nissan, Subaru, and Isuzu, and also to Ford, Chrysler, General Motors and Mercedes-Benz.

Douglas & Sons, a leading auto-parts distributor in the country, holds the sole distributorship for the EXEDY brand in Sri Lanka.
