

Finite Lanka Purchases TATA Tippers From DIMO

Posted on

Finite Lanka is a construction company involved in many modern construction projects in Sri Lanka such as building construction, irrigation work, water supply and waste water projects and road work.

The company has a national grading of M7 and a grading of C3 for Building, Water supply and for Irrigation work and a C1 grading for Highway construction. As such they recently purchased 10 TATA LPK 1615 Tippers and two TATA LPK 1618 Tippers to be used for road development projects, from Diesel and Motor Engineering (DIMO).

A vehicle handing over ceremony was held at the Bitumen / Asphalt Plant of Finite Lanka under the patronage of Ajith Bogahawatte, Chairman - Finite Lanka, Ranjith Pandithage, Chairman - DIMO, Vijitha Bandara, COO - TATA Division of DIMO, Rajeew Jaiswal, Country

Manager - TATA Motors, Nalinda Kurukulasooriya, DGM - TATA Division, Bandula Withanage, Manager - Finite Lanka and Vikas Soni, Area Customer Care Manager - TATA Motors.

Finite Lanka has contracted over 1,500 million rupees in construction projects mainly in competitive bid basis throughout our geographic region, which includes northern and eastern parts of the country. They employ over 35 experienced construction professionals and specialised craftsmen.

TATA is the number one commercial vehicle brand in Sri Lanka. And part of this success has been due to the sales and aftersales facilities available Island-wide, DIMO's 24-Hour Road Side assistance for TATA vehicles and superior product performance. TATA vehicles provide convenience, ease of mind and better profitability due to low operational costs and down time.
