

First high-tech American project launched

The first high-tech American project, by far the largest of its kind in the country, was inaugurated at Pallekele Industrial Park, Kandy.

The IQs. 75 billion Board of Investment (BOI) approved project which will turn out electronic and computer software, will provide over 4000 job opportunities to the locals.

The Tandon Group of Companies and Golden Systems Lanka (Pvt.) Ltd., who embarked on the project are the first US investors in high-tech electronic products in the country.
