

FXI Surface Modifier (for vehicles and industrial machinery)

Posted on

This first environmentally-acceptable lubricant can be used on vehicles and machinery. It is introduced by ECOGEN (UK), a company producing ecologically favorable products. FXI eliminates surface friction and drag. Reduces heat and vibration upto 50%. It cleans, polishes and protects metal part and reduces oil consumption by upto 20%. It saves on gas, petrol and diesel by upto 20%. With the use of FXI, exhaust emissions and operating noise will also be reduced. Imported by Mackwoods Ltd.
