

IJM Launches Welded Wire Mesh With Amtek Engineering

IJM Steel Products - India, manufacturer of the IJM Welded Wire Mesh appointed Amtek Engineering (local agents for 'MFE Formwork Systems - Malaysia') as their local representative.

IJM Welded Wire Mesh is used as steel reinforcement in concrete, replacing the traditional cut, bend and placing of steel bars. Technical advantages of Pre fabricated Reinforcing Mesh including wider availability of wire sizes and spacing, higher shear strength at joints, strong mechanical anchorage of the weld and better crack width control, better bond strength, factory made product, complete elimination of errors in laying, help meet lacing tolerances, saving of labour and binding wire and faster construction.
