

Internationally Renowned BOSCH Service Centre Now In Sri Lanka

Posted on

DIMO recently introduced the internationally acclaimed car repair and maintenance concept - BOSCH Service Center to Sri Lanka. The partnership between BOSCH and DIMO spans more than six decades, comprising everything from BOSCH automotive components to power tools and accessories.

As an expert workshop for all car makes and models - petrol and diesel, the BOSCH Service Center guarantees optimal maintenance whenever your vehicle needs attention. With more than 15,000 BOSCH Service Centers in more than 145 countries across the globe, it is a part of the largest independent workshop organisation in the world. BOSCH is the largest independent worldwide supplier of original equipment for automotive manufacturers.

At BOSCH Car Service, customers will be served with expert advice from continuously trained workshop staff, highest quality repairs and long lasting spare parts of proven BOSCH quality. Services offered include inspections, maintenance and repairs, electrical systems, petrol injection and diesel technology, seasonal checks and air conditioning.

Qualified technicians will diagnose and repair customers' diesel systems at the BOSCH Service Center irrespective of the type of vehicle. The BOSCH Diesel Center is a part of the international diesel workshop organisation of BOSCH.

The BOSCH Diesel Center proves its high performance through its qualification as a specialist for diesel systems. In addition to the repair of conventional diesel injection pumps and components, the BOSCH Diesel Center is fully proficient in the diagnosis of all BOSCH third party diesel systems and components for any make or model. For these demanding tasks, the BOSCH Diesel Center has the latest test and repair equipment. It is also authorised for all BOSCH After Sales Services and warranty work on diesel engine vehicles.

BOSCH Service Center from DIMO provides customers with reliable and quality diagnosis. All modern vehicles having the latest engine management systems to reduce pollution are software oriented. More than 60 percent of the cars imported to Sri Lanka are not through the franchise agent, hence the BOSCH Service Center provides the opportunity for such vehicles, irrespective of make or model to be repaired and maintained to international specifications.
