

Mobitel Business Solutions Offers The Latest Technology Convergence

Mobitel Business Solutions (MBS) has strengthened its portfolio of business solutions for corporates that address all their technology needs. A division of Mobitel formulated to cater the corporate clients with ICT solutions embraced with mobile technologies to realize their fullest business potential, MBS has entered into strategic partnerships to provide enterprise grade, tailor-made Mobitel Business Solutions offers the latest technology convergence solutions with industry-leading products and technologies.

In 2018, Mobitel partnered with IBM to offer enterprise customers IBM MaaS360 with Watson, a comprehensive mobile management solution. MBS has partnered with Utech (subsidiary of United Tractors) to introduce IIOT solutions; partnered Bileeta to introduce mERP; with Cemex to introduce mHRM and Kayjay, M3Force, Fetons, Office Networks for CCTV solutions. MBS also has established partnerships with Microsoft. Its solutions are empowering the SME sector, which play a vital role in the economic development of the country. Equipped with the latest technology,

MBS' goal is to enable the target population to access mobile enterprise solutions to increase efficiency, productivity and re-engineer processes.

In the months ahead, the company will sharpen its IIOT solutions to enterprises for better management of machinery/production, pioneer carrier grade secure mission critical communication solutions as well as extend industry specific solutions for plantations, transportation, warehousing and security.
