Mobitel Partners M3Force To Launch Monitoring And Response (MnR) Center

Mobitel, the national service provider has joined hands with M3Force to launch the largest Monitoring and Response (MnR) Center in Sri Lanka.

It offers integrated intelligent security solutions for prevention and management of critical solutions in both pre and post situational scenarios.

MnR is a service for commercial, corporate and household establishments whereby properties are monitored remotely by a center and any breach or threat detection is responded to immediately by MnR staff. The response will be a combination of technology, manpower and mechanisms to deter the threat and keep MnR customers and their properties safe.

MnR solutions encompass video analytic solutions using deep learning, machine learning and artificial intelligence to detect situations in advance by detecting intruders, behavior differences and environment changes and movements.

The Center’s services include multifaceted responses to emergencies, including, but not limiting to, on-site warning, alarms, auto shutouts, instant alerts and commandos on call service. M3Force is part of WatchGuard Security and Investigation which provide security solutions comprising of the emergency responding team of ex-servicemen, technically supported by security audit and design, installation and commissioning of integrated security systems and maintenance of security technical systems.
