

Mobitel Partners With UTECH Technologies

Posted on

(L-R): Chamith Hettiarachchi, Head of Business Solutions, Mobitel; Prabhath Gamage, General Manager, Enterprise Business, Mobitel; Nalin Perera, CEO, Mobitel exchanging the partnership agreement with Riyad Ismail, CEO/Director, UTE Technologies and CEO of TTE; Aravinda Boteju, Head of IT, UTE Technologies; and Prageesh Bandaranayake, Assistant Manager Business Solutions, Mobitel.

Mobitel's business solutions portfolio provides corporates with enterprise grade, tailor-made solutions with industry leading products and technologies to address all their needs. Mobitel announced a collaboration with UTECH, where Mobitel offers customized IIoT (Industrial Internet of Things) solutions catering to industries spanning from manufacturing, construction, power, agriculture and supply chain.

IIoT solutions enable industries to improve efficiencies to maximize productivity by reducing downtime and thereby improving overall profitability.

Mobitel and UTECH will work closely to conduct joint research and development for new requirements, which enable to provide a totally customized IIoT solution, that aims to function seamlessly with customers' existing systems, supported by the strengths of the strategic alliance. Mobitel's goal is to enable the target population to access enterprise solutions that would help them increase their efficiency, productivity and re-engineer processes.

UTECH is a subsidiary of United Tractor and Equipment (UTE), an engineering solutions that provides engineering solutions to construction, power, environmental engineering and material handling and manufacturing sectors.
