Pan Asia Bank empowers customers to tackle the Energy Crisis

Yohan Ebell, Head – Retail Credit, Pan Asia Bank.

Pan Asia Bank has taken proactive steps to support customers in navigating Sri Lanka’s ongoing energy and fuel challenges by introducing its innovative EV Plus Leasing solution.

The EV Plus Leasing facility is a forward-thinking, bundled solution that combines electric vehicle (EV) leasing with a pre-approved solar energy financing option. Anchored to an EV lease, the package includes an additional loan or lease facility of up to one million rupees for the installation of a home solar system. Designed for both personal and business users, the facility offers flexibility in acquiring brand-new, reconditioned, or registered electric vehicles. It also enables customers to refinance or take over existing EV leases from recognized financial institutions, enhancing accessibility and convenience.

A key advantage of the EV Plus solution lies in its coordinated structure, which manages approvals and disbursements seamlessly, eliminating the complexity of

handling multiple financing arrangements. The solar financing component is customized to individual needs, offering competitive rates and flexible repayment options for affordability. Customers benefit from expert guidance on EV ownership, charging, and energy efficiency to support informed decisions and long-term savings.

Yohan Ebell, Head – Retail Credit, Pan Asia Bank, highlighted the Bank’s commitment to delivering innovative, future-ready solutions that address rising energy costs while promoting sustainability. By reducing reliance on fossil fuels and supporting renewable energy adoption, Pan Asia Bank is contributing to a more resilient, cost-efficient, and environmentally sustainable future for Sri Lanka.
