People's Bank and Hayleys Solar, have signed a Memorandum of Understanding (MoU) in an alignment geared towards promoting sustainable energy adoption.

This collaborative effort is aimed at catalyzing the widespread adoption of solar energy by facilitating access to better financing options.

Under this MoU, People's Bank will provide loans to customers seeking to invest in rooftop solar power for their homes or businesses. The availability of these loans will empower

individuals and enterprises to embrace solar energy, reducing their carbon footprint, and contributing to a cleaner environment.

The introduced loan programs are specifically designed to provide customers with an affordable loan installment option each month, instead of continuing with the burden of a higher electricity bill.

This monthly saving option is available for any system capacity, and the savings amount will grow with the capacity of each system. By availing of this option, customers can save on their monthly utility expenses, and use those funds for other essential needs. This one-time financial investment will replace an expensive monthly expense with a more affordable one, reaping long-term savings.
