

People's Bank launches its 125th Cheque Deposit Kiosk at its Mid-City branch

People's Bank marked a major milestone in its digital banking journey with the launch of its 125th Cheque Deposit Kiosk (CDK) at the Self Banking Unit of its Mid City Branch. The event, held under the patronage of Clive Fonseka, CEO/GM represents the highest number of cheque deposit kiosks deployed by any commercial bank in Sri Lanka. The achievement coincides with the Bank's 65th Anniversary, reflecting its continued commitment to digital innovation and customer-centric banking solutions.

The bank's network has expanded islandwide, providing customers with a fast, secure, and convenient method of depositing cheques. The kiosks eliminate the need for deposit slips, requiring customers to enter only basic details such as their account number, NIC number, and telephone number. The machine captures cheque images instantly, displays them for verification, and issues an

acknowledgement receipt upon completion of the transaction. To further enhance customer convenience, People's Bank has introduced an e-receipt service, enabling customers to access detailed deposit information and cheque images through a secure link sent via SMS.

The kiosks allow customers to deposit multiple cheques in a single transaction, making them particularly useful for current account holders managing daily collections outside banking hours.
