

People's Leasing and Finance celebrated the World Environment Day 2023

Highlights of the Tree Planting Projects carried out by People's Leasing Branches.

In commemorating the 65th Anniversary of the Finance Houses Association of Sri Lanka (FHA), an islandwide tree planting initiative was held, marking World Environment Day 2023. The primary objective of this environmental day initiative was to contribute towards reducing the national carbon footprint by planting the highest number of plants within a single day in history in collaboration with the FHA member corporates.

As a fellow member of FHA, People's Leasing & Finance took part in this environmental initiative while contributing to advancing the United Nation's Sustainable Development Goals. PLC successfully planted 14,195 saplings at 92 selected locations in the Western, Southern, Central, North Central, and Sabaragamuwa provinces with the active voluntary participation of staff members at the branch footprint of PLC.
