Revlon Introduces Touch & Glow For Fairer, Healthier Skin

The cosmetic brand Revlon Lanka announced the launch of its Touch & Glow range. Touch & Glow is an Advanced Fairness line that gives visible fairness and glowing complexion in less than four weeks. This comprehensive range of skincare products will leave skin healthier, fairer and smoother.

Each product is designed to address a concern; therefore, used in combination, the range will help create and maintain flawless skin. This range holds healthy benefits of Vitamins, aloe and natural extracts which do wonders for the skin. The products help lighten complexion, moisturise skin, minimise dark spots, protect skin from harmful rays of the sun, fade away under-eye circles and prevent blackheads and breakouts.

The products in the Advanced Fairness line of the Touch & Glow range will systematically help lighten the skin and enhance its natural glow. The Touch & Glow Advanced Fairness Face Wash gently removes dirt, oil and impurities, leaving skin sparkling clean. The botanical extract of “Bearberry” lightens the complexion and Vitamins E, C and B5 moisturise the skin whereas the Witch Hazel extract reduces the size of pores.

The Advanced Fairness line also includes the Touch & Glow Advanced Fairness Daily Moisturizing Cream SPF15 and the Touch & Glow Advanced Fairness Daily

Moisturizing Lotion SPF15. These products reduce the formation of black pigments and diffuse already formed aggravated black pigment spots. While protecting the skin from harmful UVA and UVB rays, the products also moisturise and enhance the skin’s natural glow.

Infused with Lotus, Bearberry and Licorice extracts, which are skin-lightening agents, the Touch & Glow Advanced Fairness Instant Mattifying Cream ensures that skin remains shine-free all day long. This product also maintains the skin’s moisture balance.

The Advanced Fairness Under Eye Repair Cream is gentle on the skin around the eyes as it fades away dark circles by increasing blood circulation in the under eye blood vessels. It also prevents discoloration and puffiness under the eyes, while moisturising and brightening the area.

Dark spots will disappear rapidly under the gentle care of Touch & Glow Advanced Anti-Spots Intensive Essence. While diminishing the size and intensity of black spots and reducing the formation of new ones, the product boosts the skin’s elasticity and moisturises the skin.

The Advanced Sun Care line of the Touch & Glow range includes the Daily Moisturizing Lotion SPF15. These products protect skin from harmful UVA and UVB rays, moisturise the skin and prevent tanning, formation of black pigment spots and premature aging.

The Pimple Corrector is also one of the essential products that make up the Touch & Glow range. It reduces sebum and prevents blackheads, clogging of pores and breakouts.

In a nutshell, this range is all you need to make your skin not only look healthier but also feel healthier.
