Sri Lanka Telecom, the national ICT solutions and digital services provider signed an agreement with International Construction Consortium (ICC), one of the largest civil engineering organizations in Sri Lanka to construct Ocean Front Condos, the new pinnacle in luxury beach front residential getaway in Galle.

On behalf of ICC, Namal Peiris, CEO, and Vajira Sudantha Nagodavithana, Director and on behalf of SLT, Kiththi Perera, CEO, and Imantha Wijekoon, Chief Sales and Regional Officer signed as authorized signatories.

Under the agreement, SLT will act as the digital services provider to the 94 luxury apartments in Ocean Front Condos, Galle.

The Condos will be powered by SLT's ultra-fast fiber connectivity, providing residents with access to the company's superior broadband connectivity that enables speeds of up to 100 Mbps, crystal clear voice communications and high quality entertainment services via the company's IPTV platform, PEO TV.

Namal Peiris, Chief Executive Officer, ICC, voiced his thoughts on the partnership,

stating “We are glad as well as excited to partner with SLT, the leading digital solutions provider in Sri Lanka for our latest Ocean Front Condo in Galle. To provide the best to our customers we had to partner with the best. We are confident that Sri Lanka Telecom will be able to provide services that are on par with our high standards. We believe that this partnership will be instrumental in helping us to keep our promise to our valued customers – to provide a luxurious and exclusive lifestyle.”

Kiththi Perera, Chief Executive Officer, Sri Lanka Telecom stated, “We are indeed honored to have been selected as the digital services provider by the International Construction Consortium, which is a renowned name in construction industry in Sri Lanka. We believe that through this landmark partnership, we will be able to add value to both to the apartment residents and to ICC by supporting them to maintain the highest standards of luxury in their apartments via our superior fiber connectivity, and to the apartment residents by completely revolutionizing their digital lifestyle experience and redefining their experience of ‘luxury’.”
