

SLT-MOBITEL Empowers Apple iPhone Users across Sri Lanka to Embrace the 5G Revolution

Posted on

SLT-MOBITEL provides a ground-breaking opportunity, enabling customers with the latest Apple iPhone devices to experience the best 5G technology through its state-of-the-art 5G trial network. Apple users with 5G compatible iPhone devices and the latest iOS 17 update can now experience 5G when they are in a SLT-MOBITEL 5G trial zone.

Recognising 5G as a game-changer, SLT-MOBITEL was the first to trial 5G technology in South Asia in 2018 and has been at the forefront of the 5G revolution in Sri Lanka ever since. Recently, SLT-MOBITEL expanded its 5G pre-commercial trial network across main cities, including Colombo, Anuradhapura, Kandy, Galle, and Jaffna, allowing customers to seamlessly explore the possibilities of 5G technology.

Celebrating the new offering, SLT-MOBITEL provides its customers with an impressive 10GB of free trial data on the lightning-fast 5G network. The trial data allows users to

explore the capabilities of 5G without an initial cost and harness the full power of 5G technology, unlocking a world of new possibilities.

SLT-MOBITEL extends a special invitation to customers who own 5 G-enabled iPhone 12 devices and beyond to seize this exciting opportunity and become part of the 5G revolution by updating their eligible iOS devices.
