

# SLT-MOBITEL Enterprise Empowers Businesses with Data Center and Cloud Solutions

Posted on

Today, most Enterprises seek to adopt modern solutions across their IT ecosystem to spur innovation, drive progress and accelerate digital transformation.

SLT-MOBITEL Enterprise has deep expertise and end- to-end capabilities to help organizations navigate complex IT challenges and drive business outcomes.

The next-generation data center and cloud solutions of SLT-MOBITEL Enterprise help enterprise customers address evolving needs, ensuring businesses are competitive,

adaptable, and secure through digital enablement.

On par with global standards, the state-of-the-art Data Center (DC) is recognized as the largest rack space provider in the country, a recipient of Uptime Tier III Standard, Green Gold, ISO 27001, and ISO 900 Quality Standard certificates.

Demonstrating commitment to service and performance, SLT-MOBITEL Enterprise offers the highest SLA for colocation service. Scaling up the high-speed network and as a regional data center hub, SLT-MOBITEL DC is globally connected via the undersea SEA-ME-WE cable, equipped with world-class brand support systems, and offers a shared workspace for business continuity.

With 24×7 security surveillance and monitoring of the network management system (NMS), the DC assures customers of peace of mind in addition to uninterrupted backup power, chiller systems that control the temperature to optimum levels, and the advantage of carrier-neutral DC for global IT services providing flexibility.

Streamlining operations through robust cloud enablement and transforming businesses, SLT-MOBITEL

Enterprise offers Akaza Multi-Cloud as the intelligent cloud and enterprise premium cloud service offering for customer infrastructure and data needs. Akaza is also the first service provider to partner with global giants unveiling the multi-cloud experience in Sri Lanka, including VMware, Azure stack, Oracle services, Microsoft 365, and CommuniGate Pro Email solution.

Akaza's technology typically integrates all cloud services, including IaaS, PaaS, DaaS, SaaS, and CaaS. A gamut of services ranging from infrastructure to software can be accessed through a self-service catalog online, centralizing user management. Users are provided a pay-as-you-go option as a cost-effective method to secure management of essential data and information and reduce downtime to maintain and troubleshoot. Akaza's full self-service and billing portal ensure instant 24×7 live help desk supports IT-related service delivery speeds and internal efficiencies.
