SLT-MOBITEL Enterprise is offering a comprehensive suite of technological solutions and outstanding packages contributing to the resurgence of the hospitality sector and supporting national growth.

Inviting sector stakeholders to equip their hotels and properties with the best ICT solutions, empowering their businesses, and facilitating an increase in tourist arrivals, the Check-In solution is a cloud-based system enabling establishments to stay in control from even afar.

Check-In business solution comprises key features, including a Booking Engine integrated with a payment gateway and online travel agents, Calendar Management with a customizable calendar and real-time updates, Payment and Invoicing Modules, a Housekeeping Module with the ability to automate the assignment of tasks, CRM functionalities to track customer information and needs, and the facility to generate a large variety of reports.

Further enhancing guest experience, SLT-MOBITEL Enterprise provides next-generation voice, networking, data hosting, and managed services as a one-stop-shop, including unbeatable offers making the hospitality sector smarter through technology and able to grow faster.

SLT-MOBITEL Enterprise offers Voice service enabling hotels to convert their communication system into their unique communication circle. A range of fixed and mobile connectivity offers allow properties to conduct their internal communication conveniently and without interruptions.

Unlimited Internet is also provided to meet all needs. Enterprise Wi-Fi ensures visitors have access to seamless internet service, supporting hotels to manage data by tokenizing data. In addition, an unrivaled Extra GB package is available to help hotels enhance their digital presence or conduct day-to-day activities.

Providing the best entertainment options for hotel customers, PEO TV offers up to 15 connections through one single fiber line. Securing hotel PCs and laptops from unwanted cyber threats, SLT-MOBITEL Enterprise provides a Kaspersky IP Endpoint as part of the solution. Surveillance solutions are also accessible, catering to diverse security needs.

Bizchat, the specialized chatbot service, is available to help hotel employees respond to customer queries 24 x 7. Supporting guests to gain access to instant information on the

country and attractions, the TeDi Alexa Smart Hub as a tech- drive solution is also available.
