

SLT-MOBITEL launches enhanced 'Home 4G LTE Broadband'

Posted on

SLT-MOBITEL has introduced a revamped Home 4G LTE Broadband portfolio in Sri Lanka, featuring new packages with attractive connection charges and increased data allocations tailored to various customer needs.

SLT-MOBITEL's new HOME 4G portfolio enhances broadband accessibility with ten

curated postpaid packages, down from 28. This simplification makes it easier for customers to choose plans that suit their needs while ensuring superior value for money.

The revamped portfolio offers enhanced data quotas at competitive prices without sacrificing service quality catering to both prepaid and postpaid customers. Tailored postpaid packages provide data allowances from 50GB to 400GB monthly, ideal for heavy streamers and gamers, starting at just 1,290 rupees.

A notable feature throughout all postpaid volume-based packages is the free nighttime data, which provides unlimited data usage from midnight to 7 AM, enabling customers to maximize their usage during off-peak hours. For working professionals, the 100-200GB packages are designed to support video conferencing, cloud storage, and remote work needs while maintaining budget efficiency.

SLT-MOBITEL has introduced two new prepaid packages that offer 35GB and 75GB of data for 30 days, covering essential needs like social media, basic streaming, and online education. These competitive rates provide flexible options for those who prefer a prepaid model.

To enhance its value proposition, SLT-MOBITEL is set to launch PEOTV over 4G LTE, providing improved convenience and entertainment through high-speed wireless connectivity with hassle-free self-installation. This initiative targets both new and existing 4G LTE double-play broadband users, offering a variety of infotainment and on-demand entertainment with wireless flexibility. The service delivers seamless access to live sports, favorite shows, movies on demand, and premium content, combining superior entertainment with the convenience of wireless technology.

Prabhath Dahanayake, Chief Marketing Officer of SLT-MOBITEL, stated, “The revamp of SLT-MOBITEL’s Home 4G LTE Broadband portfolio is a direct response to the evolving needs of our customers. As the number one provider of broadband internet in Sri Lanka, we are dedicated to continuous innovation and ensuring our services deliver unmatched value and convenience. These new ‘HOME 4G All Set in Every Way’ packages truly embody SLT-MOBITEL’s commitment to enabling seamless connectivity that fits every speed, budget, usage, and lifestyle.”
