SLT-MOBITEL Offers Unparalleled Benefits with eSim Services

SLT-MOBITEL offers an easy and seamless way to join the network with its cutting-edge eSIM service. Powered by SLT-MOBITEL’s unparalleled 4G connectivity and extensive island-wide coverage, this proposition empowers customers to get connected within minutes—wherever they are.

SLT-MOBITEL eSIM eliminates the need for a physical SIM card, enabling new customers to digitally activate their preferred mobile connections. This hassle-free solution offers convenience and supports global digitalization and sustainability efforts. Whether at home or on the go, customers can enjoy unmatched data speeds backed by SLT-MOBITEL’s superior network coverage.

Customers connecting to SLT-MOBITEL eSIM services can enjoy the flexibility of having multiple eSIM profiles, each designed to cater to different connectivity needs. Customers can easily tailor their connectivity to suit their lifestyles and

preferences, whether for work, home, or roaming abroad. Further, customers will also receive 15GB of Anytime Data for free and 100 Minutes to any network. This limited offer is available for anyone onboarding the network and has a perfect start to experience SLT-MOBITEL’s seamless network experience.

Customers can avail of the eSIM service by visiting the Mobitel website.lk/esim, fill out the necessary information, upload the required documents, and sign off with the payment process via credit or debit card. To check if your device is compatible with SLT-MOBITEL eSIM, dial *#06# on your phone. If you receive an Embedded Identity Document (EID) number, your device is eSIM-ready. During this online onboarding process, you can choose from a range of popular plans, such as the SLT-Mobitel 555 Any Data Combo Plan, Social Chill Plans, or the Aviator Plans that offer extensive benefits and rewards based on one’s preference.

SLT-MOBITEL’s eSIM service is a key initiative under its Environmental, Social, and Governance (ESG) commitments. It reduces dependency on traditional plastic SIM cards and makes customers part of its drive toward building a greener future.
