SLT-MOBITEL Recognized as the Fastest 4G Mobile Network by Ookla

Reaffirming its commitment to providing a fast and superior network user experience in Sri Lanka, SLT-MOBITEL Mobile has once again been recognized as Sri Lanka’s fastest 4G mobile network by Ookla, the global leader in fixed broadband and mobile network testing applications, data, and analysis.

SLT-MOBITEL was recognized by Ookla of Speedtest Intelligence data as the Fastest

4G LTE Network in Sri Lanka for the first half of 2024, cementing its position as the undisputed leader in mobile network performance and superior user experience. The achievement highlights the company’s dedication to excellence in digital infrastructure in the country, aligning with the growing demand for reliable mobile services and catering to the ever-evolving digital needs of both retail and corporate consumers.

Setting a benchmark in the market, SLT-MOBITEL was previously acknowledged as the fastest mobile network for three consecutive years in 2019, 2020, and 2021 by Ookla Speedtest Intelligence data. Recognizing that consumers deserve a reliable, high-quality mobile broadband experience, SLT-MOBITEL is committed to continually elevating its standards through service optimization and innovation, empowering Sri Lankan citizens to embrace a truly digital lifestyle experience.

SLT-MOBITEL’s achievement demonstrates relentless commitment towards continuous investment in telecommunication infrastructure, ensuring the most comprehensive coverage and customer experience. As part of its central role in the digital transformation of Sri Lanka, SLT-MOBITEL has fuelled investments of over USD one billion in shaping Sri Lanka’s ICT landscape.

SLT-MOBITEL has also made significant strides in 5G technology. The company was the first in South Asia to trial 5G and has established pre-commercial 5G trial sites across key cities in Sri Lanka, paving the way for the future of connectivity in the country.
