

SLT Provides Total Communication Assurance To Ceylinco Life

Sri Lanka Telecom, the number one integrated telecommunications service in the country, has entered into an agreement with Ceylinco Life, to provide a total communications solution comprising of video, voice, and mission critical data services seamlessly connecting 142 Ceylinco Life branches.

This project is also another landmark achievement for the national telecommunications provider, which brings distinction to the role it plays as the protagonist of connecting businesses to the masses.

Commenting on this agreement, R Renganathan, Chief Executive Director, Ceylinco Life, said, “We expect to see a paradigm step up in service levels to policy holders as well as prospective customers. In future, the possibilities are even more exciting. SLT’s solution will enhance our business capabilities and processors via SLT’s state-of-the-art technology.”

SLT’s broad solutions portfolio includes data centre and disaster recovery facilities that ensure business continuity for large enterprises like Ceylinco Life, providing them unmatched reliability, scalability, and quality of service.

Shoji Takahashi, CEO of SLT, said, “We are glad to provide a total data and voice

communication solution to Ceylinco Life. I am confident that our communications solutions will give Ceylinco Life a competitive edge over its competitors through our managed, secure, cost-effective, and intelligent IP network.”

Today, with NTT Communications of Japan as a strategic partner, SLT provides facilities and services such as voice, data, video, and mobile to its customers, which are unmatched in scope.
