‘SLT Storage’

In a world where techno□logical advancement has made for a constant and voluminous churning out of digitized mate□rial, efficiency of storage is all about convenience and security.

This is where SLT storage can become your most trusted friend when it comes to storing your important photographs, videos, music and documents securely.

Powered by SLT Akaza Cloud, the SLT Storage ensures that users will not have to worry about running out of space or losing data due to any damages suffered by their current storage units, be in their PC, laptop, phone or hard drives.

Users can access their files on the go with the SLT Storage app, automatically sync files and folders to their desktop. More□over, it allows users to back up their contacts and SMS if they are an android user.

SLT Storage also allows users to share large files containing photos and videos as well as maintain it safe from data in□fringers.

It not only offers an efficient built-in search engine, but also offers the lowest storage cost in the market.

SLT Storage is available for everyone and comes with both prepaid and postpaid options.

The storage is available in three packages — 5 GB, 50 GB and 100 GB, of which 5 GB stor□age will be free for three months, when subscribing for the first time.
