Vision Care Hearing Solutions has opened its latest independent Audiology Unit on the second floor of Vision Care, located on Colombo Road in Panadura. This new facility is one of six specialized audiology centers across the island, further reinforcing Vision Care Hearing Solutions' commitment to providing world-class hearing healthcare to all Sri Lankans. Renowned ENT specialist Dr. Selvi Vettivelu ceremonially inaugurated the Panadura Audiology Unit, which offers a comprehensive range of services designed for individuals of all ages, from infants to the elderly.

The facility is equipped with advanced diagnostic tools for behavioral hearing assessments, including speech audiometry, SISI, Tone Decay, and various special tests that enable the accurate diagnosis of hearing disorders.

Chathira Siriwardena, Head of Audiology and Strategic Partnerships, as well as an Audiologist and Speech-Language Pathologist at Vision Care Hearing Solutions, stated, "Our goal is to make comprehensive hearing care accessible to everyone. This new center in Panadura reflects that mission."

We've created a space equipped with cutting-edge technology, experienced professionals,

and a full suite of services to ensure the community receives the care they truly deserve.” Among the key features of the Panadura Unit is the availability of Real Ear Measurements (REM)—an advanced and internationally recognized method that ensures accurate, personalized hearing aid fittings. Vision Care Hearing Solutions is the sole agent for Oticon and Starkey hearing aids in Sri Lanka and offers a variety of styles and technology levels to meet individual needs, along with full after-sales support, accessories, and home visit services.

To address a broader spectrum of communication challenges, the center also introduces Speech and Language Therapy services alongside consultations with ENT doctors, creating a comprehensive care environment that supports improved hearing, speech development, and overall well-being.
