Suresh Edirisinghe, Chairman Global Conversions, in the presence of Nivran Weerakoon, Director/CEO, Global Conversions, Max Adam, Director, Global Conversions, Sulith Fonseka, Head of Operations at Global Conversions and the Global Conversion Team.

Global Conversions, specializing in automobile re-engineering, has achieved a remarkable milestone in the automotive industry by successfully converting the world's first Hummer EV SUV to right-hand drive. This groundbreaking achievement exemplifies Global Conversions' commitment to innovation and excellence in vehicle conversions.

Global Conversions has been at the forefront of automobile re-engineering, specializing in converting American left-hand drive vehicles such as GMC, Ford, Lincoln, Dodge, Chevrolet, Cadillac, and North American Toyota and Nissan to right-hand drive. The successful conversion of the Hummer EV SUV adds to their list of achievements.

Handing the keys to the first customer of the Right- Hand Drive Hummer EV SUV marks a historic moment for Global Conversions and the automotive industry. This milestone underscores the company's readiness to undertake and complete many more groundbreaking projects in the future.

Suresh Edirisinghe, Founder and Chairman of Global Conversions, expressed his excitement about this historic moment, stating, "We are thrilled to have completed the world's first conversion of a Hummer EV SUV to right-hand drive. This accomplishment showcases our dedication to pushing boundaries and delivering exceptional solutions to our customers."

Transitioning their operations from Sri Lanka to Ras Al-Khaimah in the UAE was a strategic move to expand their business internationally and establish a central meeting point for their customers worldwide. Despite the expansion and relocation, Global Conversions remains deeply committed to delivering exceptional quality and customer satisfaction.

The successful conversion of the Hummer EV SUV exemplifies Global Conversions' dedication to excellence. Not only have they completed the conversion, but they have also meticulously tested and validated its functionality, ensuring the highest safety and performance standards.
