ZILLIONe At IPM HR Conference

ZILLIONe is now striving to gain leadership in HR systems and with this objective in mind, participated for the first time at the annual HR Conference of the Institute of Personnel Management.

Participants at the event benefited tremendously because the company marked their presence by displaying people management solutions such as ZILLIONe PAYPAC that simplifies payrolls, ZILLIONe TAS that keeps a tab on time and attendance, along with Biometric scanners and its Employee Self Service Portal. The range of exclusive offers extended made a visit to the ZILLIONe stall truly worthwhile. These special incentives were designed to enhance the efficiency of employees and improve day-to-day HR management.

Many corporate delegates were able to enjoy a relaxed, detailed, one-to-one discussion about products and services with ZILLIONe professionals and also viewed demonstrations of DCT (Data Capturing Terminal), the new finger scanners. They were able to fully appreciate the potential of ZILLIONe’s total solutions that extend across all business functions, integrating smoothly, creating greater avenues for increased productivity.
